## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group I (claims 1-9) in the reply filed on June 21, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Kinoshita US PG-Pub 2003/0152125.

Kinoshita discloses in figs. 1-6 a surface emitting semiconductor laser chip or VCSEL (as in claim 6), comprising: a semiconductor body having, at least partly, a crystal structure with principal crystal directions or [1 0 0] direction (as in claim 9), a radiation exit face, and side faces 60°/60° laterally delimiting said semiconductor body, at least one of said side faces disposed obliquely with respect to the principal crystal directions.

As for claim 2, Kinoshita discloses semiconductor body having a rectangular cross sections disposed parallel to said radiation exit face.

Art Unit: 2826

As for claims 3 and 7, Kinoshita discloses a principal crystal directions including a given direction running parallel to said radiation exit face, and at least one of said side faces forms an angle, within the range recited in the claim, with said given direction.

As for claim 4, Kinoshita discloses (see claim 3) a semiconductor body containing a substrate 1 having, at least partly, a crystal structure.

As for claims 5 and 8, Kinoshita discloses semiconductor body containing a III-V compound semiconductor or GaAs (as in claim 8).
